Wire forms come in many different shapes and sizes. We can fabricate wire forms into shapes using different bends and angles to suit the application. We can manufacture to a sample or drawing using specialist spring making skills and equipment.

We carry a large selection of spring steel in stock and our capabilities includes metal pressing and stamping.

We can manufacture spring clips using different materials to suit the application or environment.

Spring steel strip is commonly used to make recoil springs belleville washers, nib springs, retaining clips, and push clips.

Provide your requirements or create your drawing in the section below. To attach drawing or photograph file, please submit a Quote Request Form located on our Main Page. Or for more specialist advice on spring clips or wire forms, contact us today.
